

# Lil' KEAVER 13

## FIREWOOD PROCESSOR

### ***The Bad A\*\* Baby brother of the Wood Beaver line up***

The Lil Beaver 13 Firewood Processor the most economical and perfect machine for the homeowner that cuts and burns his own firewood or small commercial producer. Built to the same strength and reliability standards as our commercial grade models, it is one tough machine. Highly mobile and designed with homeowners and farmers in mind – we kept the controls easy and straightforward. This one operator machine will quickly and efficiently cut and split logs up to 13" in diameter and 8' long at a rate of up to 1 full cords per hour. This unit is extremely powerful!! It boasts a Kohler 440 or optional Honda GX 390 gas motor. A 3 1/2" bore 2 1/2" rod specifically designed, engineered, and welded hydraulic cylinder with a 25 3/8" stroke and regenerative system for fast splitting, hydraulic saw, 2/4 way adjustable wedge. It can be towed behind almost anything. A single lever moves the multi-function log shuttle table advancing the log, splitting the last piece you cut and operating the log lift to load the next log. This machine is very *FAST!* And the log lift keeps you from dragging logs through the dirt and mud. Optional 8' or 12' on board stacking conveyors lets you build a bigger stack. We truly used the KISS method, "Keep It Simple, Stupid."

CALL FOR INFORMATION 800-569-6813

## MAXIMUM VALUE AND PERFORMANCE AT A MINIMUM PRICE!!!

### PERFORMANCE:

½-1 cords per hour (128 cubic feet/cord) approximate

Splits wood from 3” to 24” length

Maximum log length 12’

Splitter cycle time “Super Fast” 4.5 to 5.5 seconds (full cycle)

### SPECIFICATIONS:

Kohler 440, Optional Honda GX 390

DLX regenerative hydraulic system now standard

Shuttle table advances logs

Mechanical log lift

Highway axle package

Low oil pressure shut-down

2/4 Way splitter wedge adjustable

17 Ton splitting force

Integral bar oil reservoir in chain guard

Hydraulic driven 16” 3/8 58 gauge harvester saw bar/chain combination

Manual saw bar and wedge adjustment

Spring loaded clamping system for simple operation

Adjustable log length gauge

Protective lock out cover and safety screen for excellent visibility

Firewood cleanout grate

Unit weight base #1800

Oversized 10 gallon hyd. oil system

### OPTIONS:

8’ or 12’ on board conveyor system

Conveyor extension extra

Honda engine, electric start for either

Hydraulic EZ saw raise/lower

### Specifications:

Transport width - 5’

Transport length - 19’

Trailer hitch – 2” ball

Transport height – 9’

Operation width – 5’

Weight – 2250 lbs. (approx.)

Engine – Honda GX 390/Kohler CH440

Hydraulic capacity – 10 US Gallons
